Develop a web-based accounts receivable system

Project Title	Develop a web-based accounts receivable system
Project Slimmary	Develop a web-based accounts receivable/bill tracking system using the ServiceNow platform.
Country	Botswana

Project Description

The web-based account receivable system will be used to track internal employee debt to the USG. It will be built on the ServiceNow platform. Some of the basic features the system must have: tracking of bills (bill number, amount owed, due date), automatic reminder system at 30, 60, and 90 days, and reporting feature.
